13 OCT 1968

MEMORANDUM FOR: Director of Special Activities
ATTENTION: Chief, Intelligence Division
SUBJECT: Evaluation of Proposed GRC Mission C168C,
20 October 1968
REFERENCE: [] -2728/66, 24 October 1966

25X1A

1. This memorandum is a final review and analysis of Route 1067 in support of Idealist Mission C168C on 20 October 1968 over water in a northerly direction along the mainland coast from the Shantou area in southeast China nearly to Shanghai in east China. This review is in compliance with this Office's responsibilities as set forth in the reference.

2. Analysis of Route 1067 indicates that there is only a very remote chance of a SAM reaction if the route is flown as planned, at least twenty nautical miles from the mainland coast. Review of the route indicates the possibility of a MiG reaction. The most recent available AOB data indicates the presence of eleven MiG-21s at Wuhu AF (3124N/11823E) but none at any other airfield along the proposed route.
